

**Project title****AIDSETI/DSF INTEGRATION OF ICTs IN THE FIGHT AGAINST AIDS****Country, region(s)/ city(cities) of intervention**

BURKINA FASO - Region north OUAHIGOUYA

**Executing agency**

Appui Moral, Matériel et Intellectuel à l'Enfant (AMMIE)

Address: BP 320 OUAHIGOUYA

Telephone: + 226 40 55 09 24

Email: ammie@fasonet.bf

Website: <http://ammie.int.ms>**Brief summary of the project**

AMMIE turned to DSF for help in this project in its desire to render the new information and communication technology more accessible and strengthen the fight against HIV/AIDS through the establishment of a framework of exchange and training at the level of all stakeholders. This project will develop the New Information Technology to provide better services on the part of AMMIE. It will ensure a reliable database of the services offered by the association and contribute to deploying the material and financial capacities by the establishment of an income-generating activity.

**Beneficiary(ies)**

Target groups: the actors of the fight against AIDS:

- Health workers, who will benefit from distance training;
- Actors in the fight against HIV/AIDS;
- The local authority;
- Stakeholders in the field of health and education
- People living with HIV (receiving quality service).

**General aim of the project**

Integration the new information and communication technologies in the fight against HIV/AIDS to improve the services provided

**Specific objectives**

Objective No. 1 - Tele-teaching

Objective No. 2 – Tele-consultations

Objective No. 3 - Training of the physicians in better use of ICTs

Objective No. 4 - Training of the ICT agents

Objective No. 5 - Development of IGAs

**Activities**

- Ensure the provision of computers and printers;
- Ensure the provision of photocopiers and consumables;
- Ensure the provision of bookbinding equipment;
- Ensure training of personnel in the use of this equipment;
- Ensure training of personnel of the ICTs centre for operation of the service;
- Ensure operation of the ICTs service for the project activities;
- Monitoring;
- Assessment of project activities.

**Expected results**

- The courses will help health personnel to increase their knowledge and intervene effectively in their field of work;
- Efficient monitoring of patients at a distance;
- Efficient management of databases,
- Facilitation of research;
- Better understanding of HIV within the community;
- Cooperation between all national and international stakeholders in the field of health;
- Mastery of the new communication and information techniques.

### **Success indicators in terms of results**

- Competence of health workers;
- Quality of life of patients,
- Reduction of the digital divide between the North and the South;
- Integration of the information technology tool;
- Exchanges between partners worldwide;
- Strengthening of the skills of medical and paramedical personnel;
- Institutional capacities of the Association

### **Long-term vision/ Sustainability**

The development of IGAs by way of internet cafés and other applications of ICTs could provide resources to ensure the Sustainability of the project once financing has ceased. In addition, experience in the field could attract the intervention of other partners to help secure the project. We intend to enlarge our zone of action by extending the connection to all our branch offices and ensure that they exercise the same activities.
